Sunbrella® Awning/Marine Solids 46 in.

A favorite for awning and marine use, Sunbrella fabric offers excellent fade and weather resistance. The fabric is water repellent, yet is also soft and easy to work with. A wide selection of colors and patterns are available to choose from, and also coordinate with Sunbrella upholstery fabrics. Sunbrella makes it easy to create beautiful designs that outperform the elements.

Sunbrella® Mayfield Collection

Available exclusively from Trivantage®, the Mayfield Collection of Sunbrella awning fabrics is a beautiful collection of sophisticated patterns and colors combining a premium aesthetic with Sunbrella's legendary performance and durability. Classic designs in refined colors and wider repeats add style and elegance to any awning or canopy.

Coordinating awning fabrics with furniture is an effective way to elevate the appeal of shaded outdoor living spaces. Mayfield is designed to work with Sunbrella upholstery fabrics, including the Sunbrella Fusion collection, also available exclusively through Trivantage.

Sunbrella® Clarity

For awnings that are difficult to access for regular cleaning, look no further than Sunbrella® Clarity, an innovative awning fabric with low-maintenance attributes. Sunbrella Clarity features technology that works in two ways to help maintain a “like new” appearance. The first is a photoactive ingredient fueled by UV light even on cloudy days or in moderate shade. This action creates a natural cleaning mechanism that decomposes organic material such as volatile organic compounds (VOCs), grime, oils, mold and mildew.

The second part of the cleaning process is a hydrophilic or moisture spreading component that allows the surface of the fabric to wet out, washing away particles of inorganic matter on the surface. The fabric temporarily darkens, but returns to its original color after drying. Sunbrella Clarity features a coating that prevents water from penetrating through the awning.

Sunbrella® Alloy

Sunbrella specialty shade product Alloy is a contemporary shade fabric featuring a metallic look with a unique shimmer. This streamlined product offers a soft hand and is available in four colorways.

Note: Solvent-based cleaners such as acetone, liquid fuels, paint thinners, mineral spirits and turpentine cannot be applied to Sunbrella Shade fabrics that contain PVC. Such solutions may accelerate the aging and degradation of the fabric.

FABRIC	11.4% Sunbrella Acrylic, 63.9% PVC, 24.7% Polyester
FINISH	Fluorocarbon

Sunbrella® Unity

Renaissance fabrics were born from two objectives: creating beautiful vintage upholstery fabrics and recycling post-industrial fabric waste. Unity is the first Sunbrella Renaissance awning fabric. Crafted specifically for shade applications where subtle texture and distinctive detail creates a timeless charm, Unity is ideal for any awning.

Sunbrella® And Mayfield Awning Display Complete

Featuring a slender 26" diameter footprint, this rotating display can hold up to 200 individual Sunbrella awning and marine fabric swatches (including the exclusive Mayfield collection). Viewing them is easy with removable fabric hangers that pivot 85°. Inset pockets below are specifically designed to hold official Sunbrella awning and marine selling tools like the swatch book, swatch cards and brochures.

The base features a recessed door that opens to a large storage compartment with shelves, perfect for storing additional fabric samples or Sunbrella selling tools.

Available only by drop shipment. Display includes a complete set of Sunbrella Awning and Sunbrella Mayfield samples.

SGS Thermal Lettering Film

Unlike SGS Thermal Digital Print Film, SGS Thermal Lettering Film is only intended for lettering and is not printable.

The film's adhesive layer is on the face side (top) of the film, meaning that it will have to be "reverse-plotted", weeded and then applied to the fabric without the need of transfer tape – like standard SGS film.

Sold in full rolls only.

ITEM #	STYLE #	COLOR	PUT UP	WIDTH
901677	VIX1026	Black	25.153 yd.	30 in.

SGS Thermal Digital Print Film

SGS Thermal Digital Print Film is a flexible urethane film which can be digitally printed and applied to Sunbrella® or other Glen Raven fabrics using the Sunbrella Graphics System to produce high quality, durable graphics for banners, umbrellas, covers and many other textile applications where flexibility of the fabric and film is needed. The adhesive is thermal activated, is dry to the touch at low temperatures and will remain dry to the touch once cooled. The adhesive can reduce the application time by 75% compared to other pressure sensitive films. The film can also be used unprinted for white lettering or graphics where printing is not required but the flexibility/durability is important. SGS Thermal Digital Print Film is suitable for use in most solvent, eco-solvent, and UV printers. Sold in full rolls only.

Firesist®

Specifically designed for the commercial awning, canopy and shade markets, FIRESIST delivers a state-of-the-art combination of flame retardant performance and UV resistance.

FIRESIST fabric is woven from high UV and fade resistant solution dyed fiber with a proprietary coating and finish that results in superior weather, stain, mildew and flame resistance.

Extremely strong and tear resistant, FIRESIST is engineered for ease of fabrication, and features a lighter weight. FIRESIST's deep, rich colors deliver long lasting good looks and are color transfer resistant.

Weblon® Coastline Plus®

Coastline Plus awning fabric is a high performance PVC composite. It features a strong polyester base fabric, with manageable weight for excellent dimensional stability. The top surface is treated with the Rain Kleen® finish for color retention and prolonged fabric life. Coastline Plus is UV, water and mildew resistant. It is also heat-sealable for a strong, waterproof and airtight seal, and it accepts a variety of graphics including pressure sensitive graphics.

Patio 500®

Patio 500 has exceptional resistance to mildew and UV rays making this waterproof fabric the perfect choice for awnings, canopies and commercial installations in sunny, high humidity areas. Made with wick and craze resistant polyester weft-inserted warp knit scrim, Patio 500 has a matte, linen-like finish that combines long-lasting good looks with exceptional dimensional stability and superior strength. It accepts graphics including heat-sealed and inset fabrics, silk screening, hand painting, appliqué and more. Pressure sensitive adhesive vinyl graphics are not recommended. The underside of the fabric is the same color unless otherwise noted as duplex (different colors for the top and bottom).

Serge Ferrari Précontraint® 502 Satin

Précontraint 502 Satin is an evolution of the classic version of Précontraint 502 that has been a staple in North America for awnings, canopies, shade sails and light structures for the last 25 years. The new product has all the same performance characteristic as its predecessor, including dimensional stability, excellent UV resistance, heat and weather protection, and color retention and strength for long-term aesthetics and durability. However, Précontraint 502 Satin offers two new added benefits – a more desirable satin finish, compared with the classic’s glossy finish, and a new PVDF topcoat on both sides for exceptional long-term dirt resistance. Available with a 10-year warranty on fixed framed awnings and canopies (static applications) and 5-years for tents, tensile structure and retractable awnings (non-static applications).

FABRIC	High-Tenacity Polyester
FINISH	PVDF Topcoat On Both Sides
FR STANDARDS MET	California State Fire Marshal Title 19; Method 1/NFPA 701; Class A ASTM E-84
WARRANTY	10-Year

STAM 6002L

STAM 6002L is a high-performance material for open-air habitats, eco-lodges, canopies, pergolas, small tents and lightweight tensioned structures. It's high-tenacity polyester micro-yarn base cloth provides exceptional flexibility and strength, while ensuring maximum structural resistance to elongation and tearing. 100% waterproof, the PVDF finish ensures long-term resistance to UV radiation and dirt. Phthalate-free, GREENGUARD® certified, compliant with current REACH regulations and 100% recyclable through the Serge Ferrari Texyloop® operational recycling network. Available with an 8-year warranty on fixed framed awnings and canopies (static applications) and 5-years for tents, tensile structure and retractable awnings (non-static applications).

FABRIC	High-Tenacity Polyester

Main Street® +

Main Street + is ideal for awnings and canopies because it won't stretch, leak or fade even after years of exposure. This versatile fabric features a smooth surface for even greater looks and resistance to dirt build-up. It offers superior strength and resistance to water, mildew, ultraviolet rays and abrasion for many applications, indoors and out. Main Street + is easy to fabricate without puckering or fraying. It readily accepts graphics including sewn-in inset fabrics, screen-printing and hand painting.

Weathertyte® Lite

Weathertyte Lite Awning Fabric is a lighter-weight material which offers excellent weatherability and strength in a cost-effective composite membrane. As a digitally printable substrate, options for custom designed awnings, canopies or umbrellas are virtually endless.

Weathertyte's inherent waterproof properties make it easy to clean and resistant to stains and fungal growth. The lighter weight of Weathertyte Lite makes it easier to handle during fabrication and installation.

Starfire®

A tough and long-lasting, yet soft and flexible fabric, Starfire can be used for a variety of applications including awnings, banners, outdoor umbrellas and tents. Finished with an acrylic topcoat, Starfire is easy to clean and resists fading, rotting and structural weakening from prolonged exposure to the sun and other damaging elements. Starfire is also water, soil and mildew resistant. This fabric is easy to handle and install. Starfire is often specified where a cloth-like appearance is desired.

Cooley-Brite® Lite

Flexible, yet durable, Cooley-Brite Lite is a lightweight, vinyl coated polyester fabric that features excellent translucency in any back-lit sign or awning application. This line of white and eradicable colored substrates is easy to handle and simple to install. Cooley-Brite Lite suits a wide range of graphic applications, including screen printing, pressure-sensitive graphics, and spray painting with acrylic-based paint. Its advanced scrim design enhances graphic effects to provide superior quality and luminescent colors. A more resilient ink surface helps prevent fabric bruising.

Eradicating Fluid

This non flammable eradicating fluid works instantly to remove the colored ink from a variety of back-lit fabrics to create brilliant white graphics on a solid color background. To facilitate design, computer generated can be used. This solution's gentle formula will not harm the substrate or the underlying scrim. It is easy to apply, easy to work with and clean up is simple. No mess, no fuss. The graphics stay bold because this fluid resists fading and yellowing. It combines with many other decorating techniques, giving you unlimited design possibilities.

Awning Composer®

A simple way to bring your vision to life

Instead of describing your customer's awning, show them. Take a picture of your customer's home or storefront then choose from over 40 dynamic objects, including corners. Once you've built your scene, add visual options to your awning; select fabric, a valance, text or graphics.

Let your customer see how an awning will impact their home or workplace by using our real-time shade simulation. Use their building location, time of year and direction to pin point exactly where their shade will be cast.

Awning Composer version 5 is built from the ground up, incorporating ideas and feedback from hundreds of fabrications. To learn more about what Awning Composer can do for you and to try the full version of the software for 15 days, visit awningcomposer.com

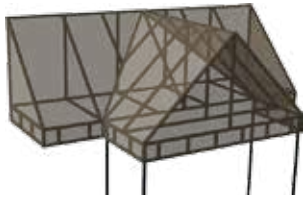

Additional Features

- Customize the shade structure or awning with different fabric patterns, valance styles, graphics and text.
- Scale backdrops using a known measurement from the building such as the height of a door.
- Dynamically generate entire 3D models, including both fabric and frame components.
- Take standard awning styles and make adjustments to the frame quickly.
- Create cutlists that can be color coded and numbered to match the frame.
- Quickly generate estimates for materials needed, materials cost, labor needed, and labor costs.
- Create custom multi-page printouts. Create layouts for sales visuals, production, estimation, and quoting.

Awning Composer Before & After

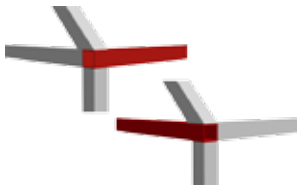

Dynamic Objects

Start with standard combination style awnings and quickly customize spacing and add poles.

Easily create inside and outside corner awnings by adding awning segments together.

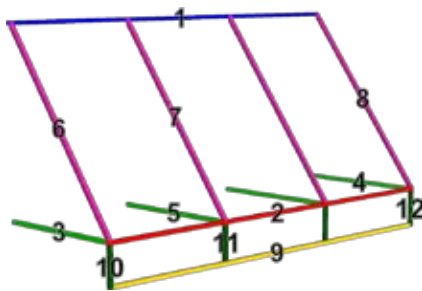

Set your preferences for master bars by using a drop down box to select master bar by location.

Add trussing by using a drop down box to select the type of truss needed.

Cut List

#	Name	Qty	Length	M1	M2
1	Open Traditional	1			
1	Top bar	1	9'		
2	Front bar	1	9'		
3	Left end out bar	1	2' 11"

12	SB front right support	1	10"		
	TOTAL	15	61' 2 3/8"		
	LENGTHS	3			

Estimation Add-on (Sold Separately)

Awning Composer's Estimation add-on brings new functionality to Awning Composer by adding the ability to estimate the amount of materials, labor time, cost of production, and retail price. Working directly with your live rendering, estimation results are updated continuously as you build and customize awnings in the 3D view.

Estimation Features:

- Extensive estimation support for 20+ dynamic awning styles plus associated corners
- An instant default quote layout
- Ability to quote more than one dynamic object in the same scene
- New printing features including the ability to build multi-page layouts

For more information or a full 15-day trial of Awning Composer's Estimation Add-on, visit www.awningcomposer.com

Sunbrella® 2016-2017 Upholstery Collection – Decorative

Sunbrella upholstery fabrics make any space look stunning, with the strength to stand up to the elements and everyday use. Perfect for both indoor and outdoor applications, Sunbrella upholstery is water repellent, bleach cleanable and fade resistant, yet incredibly soft to the touch.

With a large selection of solids, patterns, textures and jacquards, the possibilities are endless. Coordinate upholstery fabric with awnings, umbrellas, drapery, and more.

Sunbrella® 2016-2017 Upholstery Collection – Canvas

Sunbrella upholstery fabrics make any space look stunning, with the strength to stand up to the elements and everyday use. Perfect for both indoor and outdoor applications, Sunbrella upholstery is water repellent, bleach cleanable and fade resistant, yet incredibly soft to the touch.

With a large selection of solids, patterns, textures and jacquards, the possibilities are endless. Coordinate upholstery fabric with awnings, umbrellas, drapery, and more.

Sunbrella Canvas upholstery fabrics are solid fabrics, perfect for coordinating with Sunbrella patterned fabrics. Available in classic neutrals and a myriad of colors, Canvas is appropriate for upholstery for indoor and outdoor applications.

Sunbrella® 2016-2017 Upholstery Collection – Dupione

Sunbrella upholstery fabrics make any space look stunning, with the strength to stand up to the elements and everyday use. Perfect for both indoor and outdoor applications, Sunbrella upholstery is water repellent, bleach cleanable and fade resistant, yet incredibly soft to the touch.

With a large selection of solids, patterns, textures and jacquards, the possibilities are endless. Coordinate upholstery fabric with awnings, umbrellas, drapery, and more.

Part of the upholstery collection, Dupione fabrics have a unique texture with a “Dupione” silk look.

Sunbrella® 2016-2017 Upholstery Collection – Linen

Sunbrella upholstery fabrics make any space look stunning, with the strength to stand up to the elements and everyday use. Perfect for both indoor and outdoor applications, Sunbrella upholstery is water repellent, bleach cleanable and fade resistant, yet incredibly soft to the touch.

With a large selection of solids, patterns, textures and jacquards, the possibilities are endless. Coordinate upholstery fabric with awnings, umbrellas, drapery, and more.

Also part of the upholstery collection Sunbrella linen is woven to look like traditional linen, but offers the same durability as other Sunbrella fabrics.

FABRIC	Sunbrella Acrylic
FINISH	Soil, Stain and Water Repellent Finish

Sunbrella® 2016-2017 Upholstery Collection – Sailcloth

Sunbrella upholstery fabrics make any space look stunning, with the strength to stand up to the elements and everyday use. Perfect for both indoor and outdoor applications, Sunbrella upholstery is water repellent, bleach cleanable and fade resistant, yet incredibly soft to the touch.

With a large selection of solids, patterns, textures and jacquards, the possibilities are endless. Coordinate upholstery fabric with awnings, umbrellas, drapery, and more.

Sailcloth is ideal for applications where a little extra strength is desired, but also retains the soft hand of Sunbrella upholstery fabrics. Sailcloth is available in a # of neutral colors.

Sunbrella® 2016-2017 Upholstery Collection – Rib

Sunbrella upholstery fabrics make any space look stunning, with the strength to stand up to the elements and everyday use. Perfect for both indoor and outdoor applications, Sunbrella upholstery is water repellent, bleach cleanable and fade resistant, yet incredibly soft to the touch.

With a large selection of solids, patterns, textures and jacquards, the possibilities are endless. Coordinate upholstery fabric with awnings, umbrellas, drapery, and more.

Sunbrella Rib fabrics are specifically designed to withstand the rigors of sling furniture use. The added polyester yarns give the fabric its needed strength.

Sunbrella® Rain

Sunbrella Rain is a 100% waterproof version of Sunbrella upholstery fabrics. Not only does it hold the same fade resistance and mold and mildew resistance you expect from Sunbrella, with Sunbrella Rain, cushions are able to quickly dry.

Do not machine wash Sunbrella Rain fabrics. Please refer to www.trivantage.com for fabrication techniques for Sunbrella Rain.

Sunbrella® Heritage

Building on our reputation for sustainable, high performance fabric solutions, we introduce Heritage – a Sunbrella upholstery fabric featuring 50% recycled content. With a homespun look and extensive color palette, the fabric is an expansion of our existing Sunbrella Renaissance Collection of recycled products. Heritage is a blend of post-industrial recycled Sunbrella and Sunbrella virgin fiber that helps ensure that the product meets stringent Sunbrella performance standards. Because Heritage is made with 50% recycled content, there can be variations in color from lot to lot and even within a master roll. Slub yarns and fiber variations are part of the design of this product. There is a greater degree of variation in this product line than in others with blended fibers and slub yarns.

Sunbrella® Shadow

Discover fabrics that filter light while adding style and privacy to indoor and outdoor areas. Designed for use in awnings, market umbrellas, privacy screens and architectural embellishments on gazebos and other outdoor structures, Sunbrella Shade Shadow filters and diffuses light and adds privacy or decorative embellishments without completely blocking the sun.

Sunbrella Shadow features a mock-leno weave in which space is locked into the fabric, limiting the amount of sun blocked. It also allows water to pass through for fast drying and prevents weight gain from water retention that can damage architectural structures.

Offered in a variety of colors, Sunbrella Shade Shadow coordinates with many popular Sunbrella solid awning and furniture fabric colors.

Sunbrella® is a registered trademark of Glen Raven, Inc.

Sunbrella® Sheer

Sunbrella Sheer performance fabric is fade-resistant and ideal for draperies and architectural structures that call for luxurious, romantic embellishments.

Sunbrella Sheer fabric is woven from Sunbrella yarns, which makes it long lasting even under long-term sun exposure. The fabric also offers soil release for easy cleaning. In addition, water can flow through the fabric, allowing for fast drying and avoiding the risk of damage to architectural structures from weight gain due to water retention.

This plain flat weave fabric is a light, wispy sheer that takes on the coloration of background elements. And since Sunbrella Sheer is made with Sunbrella yarns, it coordinates with the entire Sunbrella decorative fabric line.

Phifertex®

Phifertex is ideal for lawn and patio furniture, umbrellas, office furniture, orthopedic equipment, upholstery, safety vests, and unique heat-filtering awnings.

Phifertex is infused with Microban® antimicrobial product protection, helping to provide an additional level of cleanliness protection that won't wash or wear away for the lifetime of the fabric. Microban protection inhibits the growth of stain and odor-causing bacteria, mold and mildew and works continuously, keeping fabrics cleaner for longer. This product is GREENGUARD® certified for low chemical emissions. UL.Com/GG, UL2818.

Phifertex® Stripes

Phifertex is infused with Microban® antimicrobial product protection, helping to provide an additional level of cleanliness protection that won't wash or wear away for the lifetime of the fabric. Microban protection inhibits the growth of stain and odor-causing bacteria, mold and mildew and works continuously, keeping fabrics cleaner for longer. This product is GREENGUARD® certified for low chemical emissions. UL.Com/GG, UL2818.

Phifertex® Olefin/PVC Blend

Suitable for both sling and cushion furniture applications, Phifertex Olefin/PVC blend fabric combines the durability of vinyl-coated polyester yarns with the softness of acrylic yarns. These fabrics are durable, antimicrobial, stain-resistant and fade-resistant, and can be woven into a # of combinations of colors and patterns.

Phifertex is infused with Microban® antimicrobial product protection, helping to provide an additional level of cleanliness protection that won't wash or wear away for the lifetime of the fabric. Microban protection inhibits the growth of stain and odor-causing bacteria, mold and mildew and works continuously, keeping fabrics cleaner for longer. This product is GREENGUARD® certified for low chemical emissions. UL.Com/GG, UL2818.

Harbor-Time®

Harbor-Time is designed for use in various marine and industrial applications. Its unique color, enhanced with a proprietary clear coating on both sides has exceptional abrasion resistance. Stabilized for minimum stretch or shrinkage will ensure continuous fit throughout application. This highly water repellent, mildew and UV resistant fabric has superior strength and long-lasting color.

Because Harbor-Time is water repellent, the use of vents when fabricating a mooring cover is recommended. A clear vinyl patch should be sewn at contact points when total protection against rub-off is desired. This fabric is non-flame retardant, and should not be exposed to direct flame or extreme heat.

Sea-Spraé®

Economical and super lightweight, Sea-Spraé is the perfect choice for lightweight bimini tops and other marine craft covers. The fabric resists water, dirt and UV rays, and is stabilized for minimum stretch and shrinkage. This durable fabric is flexible and easy to fabricate, and has excellent tear and tensile strength. Sea-Spraé features proprietary back coating to prevent color transfer, however, a clear vinyl patch should be sewn at contact points when total protection against rub-off is desired.

FABRIC	Polyester
FINISH	Acrylic Coated
WARRANTY	3-Year

Sur Last®

Sur Last can be used for many applications that require UV protection, including boat covers, bimini tops, boat storage covers, furniture covers, tonneau covers, luggage, and camping enclosures just to name a few. Sur Last is a very colorfast protective material, and because it is solution-dyed, the colors will not fade or wash out. Sur Last stands up to wind, rain, pollutants and chemicals that will make other fabrics fade. It has high UV, mold and mildew resistance, excellent tear and abrasion resistance, and is non-abrasive to gelcoat and other popular marine finishes. Sur Last also features outstanding silk screen adhesion.

FABRIC	100% Solution Dyed Polyester
FINISH	3/4 oz. Urethane Back Coating

Weblon® Regatta® Yacht Fabric

For all pleasure craft, power or sail, Weblon Regatta Yacht Fabric with Rain Kleen® finish provides the best answer for fabric accessories such as boom awnings, bimini, sun, curtains, dodgers, enclosures, cushions, mooring and protective covers.

Regatta Yacht Fabric is designed specifically for the rigorous topside exposure. This fabric is not for use for trailering covers.

Regatta is a lamination of two plies of specially formulated vinyl with an inner, reinforcing core fabric woven from high strength polyester. Regatta's exclusive Rain Kleen finish on the weather side provides ease of cleaning, prolongs the life of the fabric and adds to the pleasing appearance of the surface.

Regatta Offers You These Advantages:

- Waterproof and Mildew Resistant
- High, Lasting Strength – Lightweight
- Dimensional Stability
- Age, Stain and Fade Resistance
- Abrasion Resistance
- White Tops Reflect Heat – Pastel Linings Relieve Glare
- Wide Color Selection

Dacron® Sailcloth and Cover Cloth

Trivantage® offers a premium 3.8 oz. Dacron sailcloth for marine applications. 3.8 oz. Dacron has a stabilized finish and is a proven basic sailcloth.

Trivantage stocks a range of Dacron cover cloth fabrics in a variety of weights. These are ideal for a variety of marine cover applications, and are white in color.

Sailcloth fabrics are specially made for use in sails. Although this fabric is used in the manufacture of other products, it is not engineered or tested for these uses. In this connection we remind you that under the terms and conditions pursuant to which our sailcloth has been and is sold, the manufacturer disclaims all warranties of its sailcloth for fitness for a particular purpose.

Not for use in aeronautical applications.

Clear Vinyl Extruded

A clear, economical vinyl that is a superb source for building marine enclosures rather than many typical vinyl sheets offered on the market. Great for clear vinyl window replacements as it adapts nicely to the existing vinyl. Because this specialty clear vinyl is extruded rather than laminated, the clarity is superior to other clear vinyl roll goods.

ITEM #	DESCRIPTION	PUT UP	THICKNESS	WIDTH
972301	Firm Hand	14 yd.	0.040	54 in.
972302	Soft Hand	20 yd.	0.030	54 in.

O'Sea™ Coated Press Polished Sheets

O'Sea press polished sheets are ideally suited for applications where exceptional optical clarity and durability are important. These include marine windows, and other enclosures. O'Sea advantages include: Scratch resistance, UV durability, optical clarity, superior stain and chemical resistance and made in the USA.

FABRIC	PVC Clear Pressed Polished Vinyl
FINISH	Scratch, Stain & Chemical Resistance, UV Durability

Makrolon® AR2

Makrolon AR2 abrasion resistant polycarbonate sheet offers superior abrasion resistance and glasslike surface hardness, along with the impact strength of polycarbonate. It features a unique clear hard coat finish that resists all types of abuse, from physical attack to chemicals and spray paint. Additionally, Makrolon AR2 offers resistance from yellowing and hazing for longer service life in high profile applications.

Sea Clear Polycarbonate

Clear, thin-gauge polycarbonate for side and aft windows. Gives clear visibility and good light transmission.

Available only by drop shipment.

Recommended Handling of Sea Clear

- A masking film is used on both sides of the Sea Clear sheet or roll to prevent scratching during shipment and fabrication.
- For the best protection against abrasion damage to Sea Clear rolls, always store in and dispense from the specially designed box.
- No special tools or equipment are necessary to work with Sea Clear. Just cut and sew with your existing equipment.
- Don't forget to peel mask off when job is completed.
- The creative use of Sea Clear provides a clearer, longer lasting solution for marine or other window applications that do not require roll-up (Sea Clear is not appropriate for traditional roll-up applications).

Ultrafabrics® Brisa® Indoor/Outdoor Collection

The Brisa Collection is a group of luxurious simulated leather fabrics that are formulated to resist fading and spotting over extended periods of direct sunlight. Suited for both indoor and outdoor applications, this soft and beautiful fabric is durable and scratch resistant.

Environmentally friendly, Brisa does not contain plasticizers, heavy metals, or stabilizers, and is free of VOCs (CA 01350 compliant), POPs, HFRs (Halogenated Flame Retardants) and formaldehyde. Since most spills and stains clean easily with mild detergent and water, there's no worry about toxic chemicals and harsh cleaners polluting the air. The process is also friendly to the environment – 99% of all solvents used in production are captured and recycled.

FABRIC	Breathable 100% Polyurethane Surface with 65% Polyester/35% Rayon Backing

Nautolex® Capitano™ Marine Vinyl Upholstery

Capitano is formulated with quality pigments and additives to resist fading, bacteria and mildew growth. The colors selected for Capitano coordinate with all of today's interior carpeting, exterior gel systems, graphics and interior trim components. The sturdy, expanded construction utilizes a heavy-duty, 100% polyester filament backing that has superior strength and great stretch and set qualities. It is perfect for today's seat designs, which involve tailoring around tight corners. It has a durable skin layer, which is resistant to picking and abrasion and cleans easily.

Nautolex® Headliner

This headliner fabric is produced from top-quality upholstery fabric with a 1/4 in. polyether urethane foam that is flame laminated to the backside and stabilized to minimize the hardening and drying that is common in other foams. It also has an antimicrobial treatment to prevent the growth of mold and mildew. As a result, this headliner fabric will stand up to the high temperatures and moist conditions of harsh marine environments.

Canvex®

A translucent, reinforced plastic sheeting manufactured by weaving high-density polyethylene ribbons and coating them with a low-density polyethylene. This special weaving process produces a highly tear-resistant film that allows the ribbons to shift and “bunch up” in response to a tearing force. Canvex is commonly used for applications requiring exceptional tear resistance and minimal weight, including use on construction sites to enclose buildings and cover materials during construction. Other common applications for Canvex include temporary walls, abatement enclosures, equipment covers, silage and cargo covers, carpet and product wrappings, curtains, and insulation membranes. Also used as inexpensive pattern cloth.

Canvex I has the polyethylene coating on one side. Canvex II has the polyethylene coating on both sides. Sold in full rolls only.

SheerWeave® 2000-01

SheerWeave sun control fabrics offer exciting alternatives to ordinary window coverings. The unique light-filtering qualities of SheerWeave help reduce fading of drapes, carpets and interior furnishings while continuing to offer a view of the outside.

A basket weave designed expressly for applications that require a more opaque and nondirectional fabric. An ideal fabric for roman shades, roll-ups and vertical blinds. Average openness 5%.

SheerWeave is infused with Microban® antimicrobial product protection, helping to provide an additional level of cleanliness protection that won't wash or wear away for the lifetime of the fabric. Microban protection inhibits the growth of stain and odor-causing bacteria, mold and mildew and works continuously, keeping fabrics cleaner for longer. This product is GREENGUARD® and GREENGUARD® Gold certified.

SheerWeave® 1000

SheerWeave sun control fabrics offer exciting alternatives to ordinary window coverings. The unique light-filtering qualities of SheerWeave help reduce fading of drapes, carpets and interior furnishings while continuing to offer a view of the outside.

A ribbed-weave fiberglass fabric that offers substantial shading while allowing excellent outward visibility and daytime privacy. Average openness 25%.

For Use In: Roll-up shades, Roman shades, folding shades, pleated shades, vertical blinds, drapes, sheers and screens.

SheerWeave is infused with Microban® antimicrobial product protection, helping to provide an additional level of cleanliness protection that won't wash or wear away for the lifetime of the fabric. Microban protection inhibits the growth of stain and odor-causing bacteria, mold and mildew and works continuously, keeping fabrics cleaner for longer. This product is GREENGUARD® and GREENGUARD® Gold certified.

SheerWeave® 2100-01

SheerWeave sun control fabrics offer exciting alternatives to ordinary window coverings. The unique light-filtering qualities of SheerWeave help reduce fading of drapes, carpets and interior furnishings while continuing to offer a view of the outside.

A basket weave designed expressly for applications that require a more opaque and nondirectional fabric. An ideal fabric for roman shades, roll-ups and vertical blinds. Average openness 10%.

SheerWeave is infused with Microban® antimicrobial product protection, helping to provide an additional level of cleanliness protection that won't wash or wear away for the lifetime of the fabric. Microban protection inhibits the growth of stain and odor-causing bacteria, mold and mildew and works continuously, keeping fabrics cleaner for longer. This product is GREENGUARD® and GREENGUARD® Gold certified.

The metalized coating is fragile and must be handled with care to avoid damage. Do not scrub. Do not use tape, solvents or abrasive cleaners which could damage the fabric coating. Clean with a damp soft cloth using a mild detergent. Rinse with clean water and allow blind to dry in the down position. Do not slide metalized side across surfaces or into the cardboard tube without protective plastic wrapping. Do not use Radio Frequency sealing equipment on metalized fabric. Use only heat bars or ultrasonic sealing equipment for welding.

SheerWeave® 2705

This lightweight fiberglass fabric is woven from a unique twill pattern that displaces the individual yarns to create a two-sided fabric for maximum performance in heat reduction, glare reduction and improved visibility. Average openness 5%.

SheerWeave is infused with Microban® antimicrobial product protection, helping to provide an additional level of cleanliness protection that won't wash or wear away for the lifetime of the fabric. Microban protection inhibits the growth of stain and odor-causing bacteria, mold and mildew and works continuously, keeping fabrics cleaner for longer. This product is GREENGUARD® and GREENGUARD® Gold certified.

SheerWeave® 7100

When selecting light-blocking window treatments for a # of rooms within the same building, SheerWeave 7100 is an ideal choice. Similar to SheerWeave 2000, this laminated blackout fabric was designed to match other SheerWeave fabrics for a coordinated look. Made from PVC-coated fiberglass and laminated with a two-ply 100 percent PVC blackout film. SheerWeave 7100 comes in neutral color styles.

SheerWeave is infused with Microban® antimicrobial product protection, helping to provide an additional level of cleanliness protection that won't wash or wear away for the lifetime of the fabric. Microban protection inhibits the growth of stain and odor-causing bacteria, mold and mildew and works continuously, keeping fabrics cleaner for longer. This product is GREENGUARD® and GREENGUARD® Gold certified.

SheerWeave® BASIC 3%

SheerWeave BASIC 3% is the latest in innovative sun control fabric development. With all the benefits, certifications and technical specifications you have come to expect from SheerWeave but uniquely designed for the demanding and competitive commercial market, SheerWeave BASIC is an ideal choice for your spec-driven projects. A more robust core yarn gives SheerWeave BASIC the added durability high traffic areas and public spaces require. Suitable for all types of interior window shade applications, SheerWeave BASIC is an economical alternative to traditional solar screen fabrics.

SheerWeave is infused with Microban® antimicrobial product protection, helping to provide an additional level of cleanliness protection that won't wash or wear away for the lifetime of the fabric. Microban protection inhibits the growth of stain and odor-causing bacteria, mold and mildew and works continuously, keeping fabrics cleaner for longer. This product is GREENGUARD® and GREENGUARD® Gold certified.

SunScreen®

SunScreen reduces solar heat gain in the summer and interior heat loss in the winter, absorbing and dissipating up to 70% of the sun's heat and glare before it reaches the window, while also performing as an insect screen.

SunScreen is infused with Microban® antimicrobial product protection, helping to provide an additional level of cleanliness protection that won't wash or wear away for the lifetime of the screen. Microban protection inhibits the growth of stain and odor-causing bacteria, mold and mildew and works continuously, keeping screens cleaner for longer. This product is GREENGUARD® and GREENGUARD® Gold certified.

Super Solar Screening

Super Solar Screening offers the ultimate in shading protection by blocking up to 90% of the sun's heat and glare before it penetrates windows and doors. This fabric is installed like regular insect screening and improves daytime privacy while offering excellent outward visibility. Ideal for extremely hot windows, doors and porches, Super Solar Screening helps save energy and keeps carpets and draperies from fading.

Super Solar Screening is infused with Microban® antimicrobial product protection, helping to provide an additional level of cleanliness protection that won't wash or wear away for the lifetime of the screen. Microban protection inhibits the growth of stain and odor-causing bacteria, mold and mildew and works continuously, keeping screens cleaner for longer. The product is GREENGUARD® certified.

Serge Ferrari Soltis® 86

Soltis 86 is an ideal vinyl mesh used for exterior windows, commercial building facades, greenhouses, rooftops, or retractable awnings. It also helps regulate the thermal effect of the sun, and it preserves privacy and comfort without obstructing the view.

Serge Ferrari's exclusive and patented Précontraint® process enables Soltis 86 excellent dimensional stability for large expanses. Soltis 86 delivers exceptional durability under a variety of intense wind and weather conditions.

105-inch width rolls of Soltis 86 cannot ship UPS.

FABRIC	High-Tenacity Polyester
FINISH	Vinyl

Sunbrella® Contour

Sunbrella Contour is a rich, textured shade fabric delivering the ultimate in UV protection, color uniformity and long-lasting performance. It features a unique, patent-pending construction that emphasizes its rich colors. Offering optimal light transmission, Sunbrella Contour filters light while still allowing water to pass through.

Sunbrella Contour is more supple and less abrasive than other shade fabrics, offering easier fabrication and installation. Creases and wrinkles that may appear during fabrication will quickly smooth out after the installation.

Ideal for many applications where the aesthetic of a textured fabric is desired:

- Shade sails
- Fixed frame shade structures and engineered shade structures
- Windscreens
- Umbrella canopies and cabanas
- Canopies for casual furniture such as chaises, daybeds and loungers
- Marine applications such as cockpit awnings, biminis and fender covers Sunbrella

Contour is GREENGUARD® certified.

FABRIC	Sunbrella® Acrylic / HDPE

Architec 400®

Architec 400 is an extremely strong UV stabilized knitted shade cloth that has been designed for large commercial tension membrane structures and shade sails. It is a High Density Polyethylene fabric with an excellent weight to strength ratio, has very good tensile strength, and is extremely resistant to tearing. This fabric also incorporates the latest in ultraviolet stabilizers that provide improved color consistency and colorfastness. This fabric is lead and phthalate free.

Architec 400 cannot ship UPS due to its 150-inch roll width.

FABRIC	High Density Polyethylene (HDPE)

Polytex®

Polytex is manufactured from High Density Polyethylene (HDPE), using a monofilament and tape construction. The fabric is produced by knitting the monofilament and tape together utilizing "Raschel Knit" (lock stitch) construction to ensure that the fabric will not tear or fray if cut or pierced by sharp objects. Polytex has been designed for shade structures and architectural shade sails, providing UVA and UVB protection greater than 95%. Its high strength to weight ratio, UV performance and fire rating make it the ideal choice for small scale projects where shade and protection are desired. This fabric is lead and phthalate free.

Commercial 95® 340

An ultraviolet-stabilized HPDE monofilament and tape knitted fabric, Commercial 95 340 was developed specifically for use in fabric structures, awnings and shade covers. Strong and stable, it offers an ideal shade solution for commercial and architectural applications such as school playgrounds, sporting facilities, parking structures, outdoor cafes, car dealerships, outdoor pool areas and more.

Designed to "breathe," Commercial 95 340 allows cooling breezes to flow through, significantly reducing temperatures beneath. The fabric's knitted, lock-stitch construction prevents tearing and fraying when cut. Colors remain vivid for years. GREENGUARD®, GREENGUARD® Select and OEKO-TEX® Certified. 100% lead and phthalate free.

FABRIC	UV Stabilized HDPE Mono/Tape Construction
FINISH	Heat Treated
FR STANDARDS MET	ASTM E84, Class A (Class I-25 or under Flame Spread)
WARRANTY	10-Year Against UV Degradation

Commercial FR 300 (SaFRshade™)

Commercial FR 300, SaFRshade™, is specifically designed to be the safest choice in architectural shade fabric. Made from UV stabilized HDPE monofilament and tape yarns. Commercial FR 300 has a specialized lock stitch knit for more air movement and better channeling of cool breezes. It is constructed to block up to 95% of harmful UV rays. Commercial FR 300 is recyclable, tear resistant and will not crack, rot or fade and has a 10 year manufacturer's warranty against UV degradation. It is 100% lead and phthalate free. GREENGUARD® and OEKO-TEX® Certified.

FABRIC	High Density Polyethylene (HDPE)

Vivitex® Poly Oxford White

The Vivitex collection of printable fabrics from Glen Raven is specifically designed for use on most solvent, eco solvent, UV inkjet and latex printers, and can be used for a variety of indoor and outdoor sign and banner applications. Vivitex fabrics have excellent depth of color and detail, with a matte finish that produces a softer look. The inkjet receptive layer provides a white base to improve color management while creating a barrier which prevents ink bleed through.

This oxford weave polyester fabric has a white inkjet receptive top coat that is suitable for indoor/outdoor applications such as banners, patio/market umbrellas, P.O.P. displays, table drops, backdrops, sales promotions, revolving banners, and promotional bags. Available in full rolls only.

FABRIC	Oxford Weave Polyester

SGS Thermal Digital Print Film

SGS Thermal Digital Print Film is a flexible urethane film which can be digitally printed and applied to Sunbrella® or other Glen Raven fabrics using the Sunbrella Graphics System to produce high quality, durable graphics for banners, umbrellas, covers and many other textile applications where flexibility of the fabric and film is needed. The adhesive is thermal activated, is dry to the touch at low temperatures and will remain dry to the touch once cooled. The adhesive can reduce the application time by 75% compared to other pressure sensitive films. The film can also be used unprinted for white lettering or graphics where printing is not required but the flexibility/durability is important. SGS Thermal Digital Print Film is suitable for use in most solvent, eco-solvent, and UV printers. Sold in full rolls only.

ITEM #	STYLE #	PUT UP	WIDTH
901676	1676-0000	25.153 yd.	30 in.
901678	1678-0000	25.153 yd.	60 in.

Sunbrella® is a registered trademark of Glen Raven, Inc.

SGS Thermal Lettering Film

Unlike SGS Thermal Digital Print Film, SGS Thermal Lettering Film is only intended for lettering and is not printable.

The film's adhesive layer is on the face side (top) of the film, meaning that it will have to be "reverse-plotted", weeded and then applied to the fabric without the need of transfer tape – like standard SGS film.

Sold in full rolls only.

Evolution®

Evolution is an advanced generation fabric, ideal for a wide range of protective applications including automobile covers, sports and equipment bags, marine covers, and tarpaulins. With four-layer construction, it is strong and durable, yet lightweight and drapable. Evolution offers excellent UV resistance and water repellency. Its breathable barrier allows air to circulate and keeps moisture and contaminants out. The fabric is washable, quick drying, mold and mildew resistant, and won't stretch or shrink. All styles have a gray backside.

Softouch™

Softouch is a combination of an acrylic coated woven polyester and a soft non-woven backing of 100% polyester. Fabricating professionals can now provide their customers with a material that has the strength, dimensional stability and water and abrasion resistance, along with a scratch resistant softness that comes from the non-woven backing. Now fabricators, covering sensitive gelcoats, critical painted surfaces and delicate objects, can provide worry-free protection. Resists surface growth of mildew, but should not be folded and stored while wet.

Coverlight® CSM Coated Nylon

Coverlight CSM coated nylon features all the advantages of Neoprene coating, but with exceptional abrasion resistance. One of the most versatile cover fabrics. Withstands deterioration by weather, ozone, sunlight, heat and moderately corrosive chemicals. This fabric offers excellent service at high temperatures. More resistant to high temperatures (up to 225°F) and oxidizing agents than Neoprene or vinyl.

CSM Coated Nylon can be sewn or cemented to provide airtight and watertight seams. CSM Coated Nylon cannot be heat or R.F. welded.

Suggested Uses: Lifeboat covers, steam fumigation covers, truck tarpaulins.

FABRIC	Nylon
FINISH	CSM (Chlorosulfanated Polyethylene)

Coverlight® Neoprene® Coated Nylon

Coverlight Neoprene coated nylon is a versatile general purpose material that provides good resilience and tensile strength. A popular choice for truck tarps, machine covers, and aircraft wing covers. This fabric is resistant to water, mildew and many solvents and petroleum based products. Available with a textured or a dusted surface. The dusted surface requires buffing before applying cement, but is less expensive and lends itself to a better surface for slipping the material on and off a truck, aircraft or similar type equipment. Material cannot be R.F. welded.

Performs well at temperatures up to 225°F

FABRIC	Nylon
FINISH	Neoprene

BetterVue™

Phifer's BetterVue insect screening for windows, doors and porches is an excellent visibility insect screen designed to maximize outward view.

Woven from small, refined yarns that improve the screen's openness, BetterVue makes visibility sharper and more brilliant. It's like a "high definition" insect screen for windows, doors, and screened porches. With BetterVue, customers see the clear and vibrant view, not the screen.

BetterVue has excellent visibility from inside and better curb appeal when viewing windows from the street. It features excellent insect protection due to 30% smaller openings than standard screen. An excellent product for coastal regions, BetterVue is available in black and has improved light transmittance and improved airflow due to increased openness.

BetterVue is infused with Microban® antimicrobial product protection, helping to provide an additional level of cleanliness protection that won't wash or wear away for the lifetime of the screen. Microban protection inhibits the growth of stain and odor-causing bacteria, mold and mildew and works continuously, keeping screens cleaner for longer. This product is GREENGUARD® and GREENGUARD® Gold certified.

Renter's Choice

Designed for canopy, tent, and indoor and outdoor banner jobs, this fabric is durable and easy to keep clean. Finished with a high gloss emboss, the fabric always looks great. Renter's Choice is resistant to water, mildew, rot and ultraviolet rays. Plus, it's heat sealable and flame retardant. The fabric can be digitally printed with either UV curable or solvent inkjet systems.

General Care and Cleaning Instructions for Selected Fabrics

Trivantage® offers the finest awning and marine fabrics in the industry, but proper maintenance is important if maximum life of the end product is desired. The following are suggestions for care and cleaning of selected fabrics, but the general guidelines – keep dirt, leaves and debris from accumulating on the surface, wash regularly with water, avoid dragging on rough surfaces, etc. – pertain to all fabrics used in outdoor applications.

Note: Trivantage offers a complete line of cleaning and protection products for industrial fabrics. See your Trivantage Distribution Center for more information.

Tips on Care of Trivantage Awning Fabrics

The life and good looks of your awnings depend a great deal on the way you use them and how you care for them. Your awnings are made from either a cotton or synthetic fabric, either of which is the finest awning fabric available. We use only the best available water repellents and mildew retardants in Trivantage awning fabrics and you can rely on our experience and quality. Even the most durable materials require a certain amount of care, and fabric awnings are no exception. With only the minimum amount of attention, your awnings will remain bright and serviceable. The following do's and don'ts are presented to help you in the proper care of your awning. The life and beauty of an awning can be preserved by following these suggestions and general tips.

Some Do's

Do keep the awnings clean. This is the best protection against mildew. Even on mildew resistant fabric, mildew can grow on accumulated dirt or foreign materials which remain on the top or bottom surface and eventually damage or stain the fabric. We cannot be responsible for such damage.

Do wash down your awnings. If they are vinyl coated, brush lightly with a cloth or soft brush. You can use a mild soap, but rinse thoroughly and immediately.

Do hose your awning with clean water occasionally, every month or so. We recommend that you do this on a hot, sunny day.

Do keep the underside of your awnings clean by simply brushing with a clean household broom.

Do keep shrubbery and vines away from the awnings, as many bushes contain an acid which can be harmful to your awnings.

Do check the condition of awning frames. Rust is not likely to form, but if it should it might cause deterioration or staining of the fabric.

Some Don'ts

Do Not fold or roll the awning in cold temperature.

Do Not drag your awning across any abrasive surfaces, such as cement, asphalt, or the awning frame.

Do Not get insect spray on the fabric, as some solutions may impair the water repellency of the fabric and cause staining.

Do Not allow water to stand on the awnings, causing pocketing and possible stretching.

Do Not overlook small rips or tears. If a sharp object punctures the fabric, it should be repaired.

Do Not wash your awnings with a harsh or strong solution, or scrub too vigorously with an abrasive cleaner.

Do Not force or yank your awnings when raising or lowering them. Do it gradually.

Do Not cook food or have fires beneath or around the awning.

Do Not store awnings when damp or wet. Mildew is a fabric's greatest foe and is caused by dampness. Mildew may grow on the surface of a damp awning and permanently stain the fabric.

Do Not permit leaves, twigs, dirt etc. to remain on your awnings as they might cause a staining of the fabric.
