

DATUM AWNING & CANOPY HARDWARE

Streamline installation with high-quality, high-strength Datum hardware components

These patented, machined components are engineered for installation precision and reliability, saving you time and money on every installation. Destructive testing proves that the high strength and security of Datum hardware requires fewer support arms, so you save on both material and labor costs.

- Crafted from rust-free aluminum and stainless steel for durability and resilience against weather
- 2" overall adjustability of the arms ensures easy, level installation, even on uneven mounting surfaces
- Arms are fully assembled for easy paint or powder coat application
- Arms and mounting plate feature a no-weld design that increases strength and aesthetics while making installation a breeze
- Arms and mounting hardware meets Florida Product Approval Ratings (FPA# 43979)
- Through destructive testing, the Datum arm, plate, and tab withstood 200MPH+ winds and over 225lbs per sq ft of snow
