

FRONTSIDE TXM-50

Wondering what it takes to get started?

Here are answers to frequently asked questions.

Expand your offerings and grow your business with Serge Ferrari **Frontside TXM-50** facade fabric. This lightweight mesh fabric enhances the appearance and performance of new and existing structures using common awning tools and techniques. If you're already fabricating and installing commercial awnings, Frontside TXM-50 can help you broaden your portfolio with distinctive building and parking garage facades, shade structures, privacy screens, and building cladding to take your business to the next level.

Q: What kind of experience is needed?

A: If you're already doing large scale commercial shade installations, you already have the skills and techniques required to fabricate and install facade fabrics like Frontside TXM-50, and the supplies you need are products you probably use every day:

- **Staplers and Staples**
- **Zip Strip®**
- **Air Hammer**

Q: How does the fabrication work?

A: There are three basic mounting styles for facade installation:

- 1. Staple-in:** the fastest and easiest method, using a fully engineered staple-in/extrusion system.
[Learn More](#)
- 2. Tension frame system** with the fabric stretched on a structural frame. Depending on the project, frames can be assembled in your shop or onsite.
[Learn More](#)
- 3. Traditional,** using familiar techniques, such as grommets with lacing cord, to install the facade fabric.

Q: What is Frontside TXM-50?

A: Frontside TXM-50 is a flexible mesh that elevates new or existing exterior designs with long-term performance and beauty, thanks to its extreme light and UV stability and mold resistance. It offers thermal and solar protection that can help reduce energy costs and improve occupant comfort. Its 50% openness complies with International Building Code (IBC) ventilation standards for parking structures, providing outward visibility and daylighting. Frontside TXM-50 is strong and crafted for high quality, with a uniform woven pattern that offers consistent strength in warp and weft, so there are fewer flaws, which minimizes waste and saves time and money in fabrication.

Q: Can I create unique designs with Frontside TXM-50?

A: The design opportunities are endless! Frontside TXM-50 is printable, so you can up-sell with unlimited branding and design capabilities. Your local sales rep can help you find printers to partner with to customize the fabric and make every project unique.
