

INFINITY CANOPY

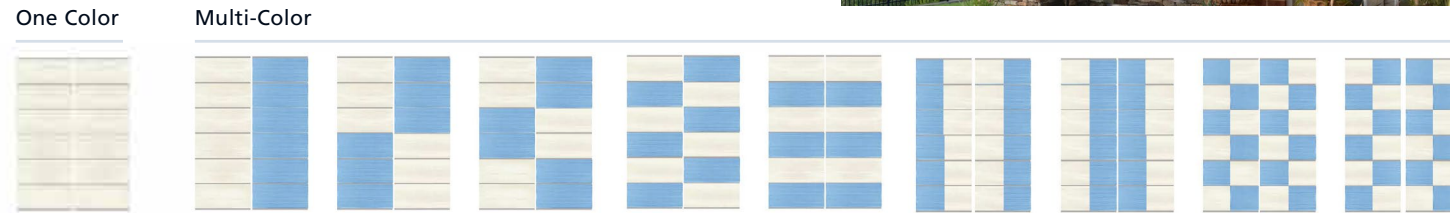

Infinite shade, infinite designs, infinite possibilities

Make custom shade projects quicker and easier with Infinity Canopy slide-on-wire components. The design is completely customizable with modular fabric panels, fitting any space and style—and should a customer's needs change, canopies can easily be modified to fit different designs or color schemes. The slide-in panels can be removed and reinstalled in minutes for easy color changes, cleaning, repairs, or winter storage.

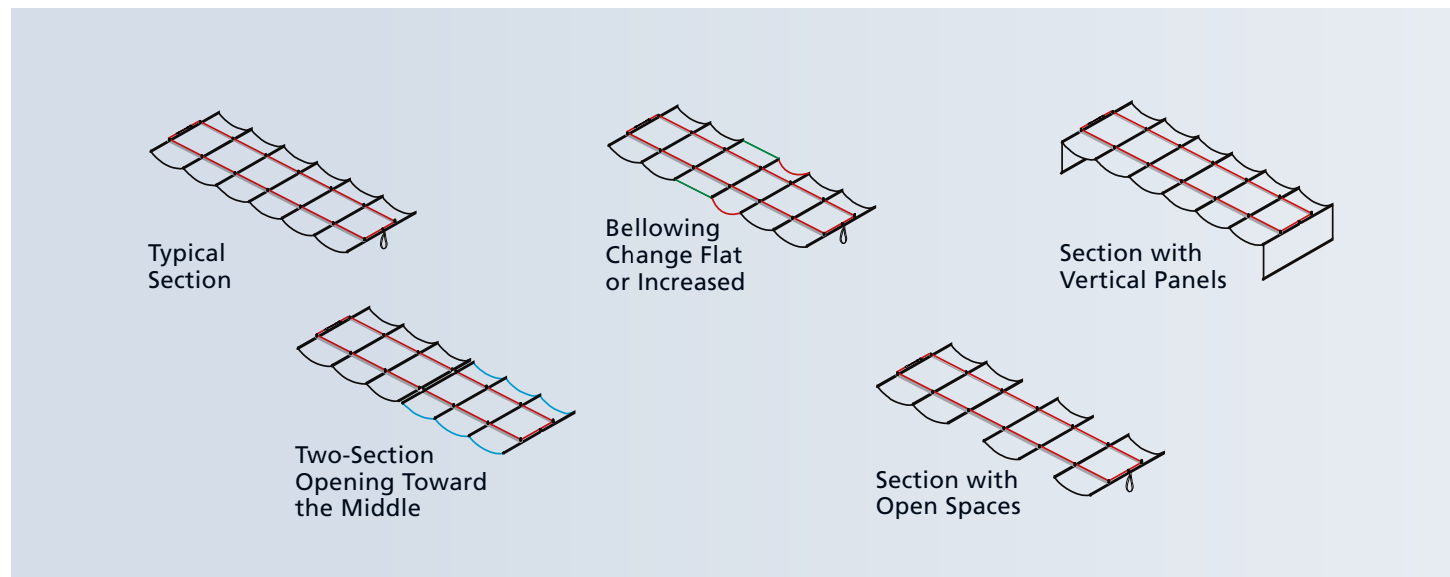

Infinite Designs

A beautiful option for both residential and commercial use, Infinity Canopy components give you the option to add color and style to any setting. The fabric panels simply clip onto the cables. In just minutes, your customers can change the colors to suit the season or their changing style. Vertical panels can also be added for additional shade and privacy.

Infinite Possibilities

In outdoor spaces, Infinity Canopy components offer cool, protective shading on pergolas, free-standing structures or between structures. Panels adjust easily, simply sliding like a curtain, or lock panels in place to create open places or shady spots. Indoors, canopies can be used to cover unfinished ceilings, unsightly rafters or air ducts, infusing a space with color and style.

Premium-Grade Hardware

Strong, corrosion-resistant components are made to match, resulting in a polished, professional-looking finished product. If needed, replacement parts are readily available for quick, on-site repairs that perfectly match the original canopy.

	Slide Wire Bar Aluminum
329100	48" #P48
329101	60.5" #P60
329102	72" #P72
