

## SAFETY DATA SHEET

### Scoured, Dyed, Printed, Coated and/or Finished Textile Fabric

Printed: October 15, 2013

Page 1 of 2

#### ADVISORY TO USERS

Kenyon Industries scours, dyes, prints, coats and finishes textile fabrics. The textile fabric is then supplied to downstream users as a solid fabric material. The textile fabric is considered to be an article that, under normal conditions, will release no more than trace amounts of a hazardous chemical and will not pose a physical hazard or health risk. The federal Occupational Safety and Health Administration's "Hazard Communication Standard" (29 CFR 1910.1200), which establishes requirements for the preparation and provision of safety data sheets, does not apply to articles. Kenyon Industries has elected to prepare and provide this safety data sheet as a convenience to its customers and to assist downstream users of the product.

#### SECTION 1: IDENTIFICATION

**Product:** Scoured, Dyed, Printed, Coated and/or Finished Textile Fabric

**Name, Address and Phone Number of Responsible Party:**

Kenyon Industries, Inc., 36 Sherman Avenue, Kenyon, RI, USA 02836 Telephone: (401) 364-3400

**24-Hour Emergency Phone Number:** (860) 478-6080

#### SECTION 2: HAZARDS IDENTIFICATION

The product described herein is a textile fabric. To the best of our knowledge, the product as supplied does not pose any of the health hazards identified in Appendix A of 29 CFR 1910.1200, nor does it pose any of the physical hazards identified in Appendix B of 29 CFR 1910.1200, nor does it pose any other hazards not otherwise classified. Based upon our knowledge, the product described herein is not a hazardous chemical. As a result, no signal words, hazard statement(s), symbols (pictograms) or precautionary statements apply to this product. Certain persons may display a sensitivity to residual chemicals used in processing textile fabrics, even when these chemicals are present in trace amounts that would not normally be deemed hazardous. These persons may experience an allergic reaction (i.e., skin rash or irritation, throat irritation, coughing, wheezing, etc.) when exposed to the trace amounts of chemicals that may be present on a textile fabric. Persons displaying such a chemical sensitivity should take appropriate steps to minimize their exposure to the fabrics in question.

#### SECTION 3: COMPOSITION AND INFORMATION ON INGREDIENTS

The product described herein is a textile fabric constructed of nylon, polyester, or a blend of nylon, polyester and/or cotton, which has been scoured, dyed, printed, coated and/or finished using a variety of chemical products, some of which may themselves be potentially hazardous. The presence of potentially hazardous chemicals in the finished fabric has been minimized by rinsing, drying and/or curing of the fabric. The finished textile fabric is not expected to contain any hazardous chemical in a quantity exceeding 1% by weight, or any chemical carcinogen in a quantity exceeding 0.1% by weight.

#### SECTION 4: FIRST AID MEASURES

The product described herein is a textile fabric that may contain traces of chemicals used in the processing of the fabric. The trace amounts of chemical present are not expected to pose a health hazard or physical hazard. Consequently, first aid measures should not be necessary. Persons who display a sensitivity to the trace amounts of chemicals present should avoid contact with the textile fabrics. Washing with soap and water should suffice in the event of exposure.

#### SECTION 5: FIRE-FIGHTING MEASURES

The product described herein is a textile fabric constructed of nylon, polyester, or a blend of nylon, polyester and/or cotton. When exposed to flame or high heat, the fabric may melt or burn, emitting hazardous by-products associated with the burning of such materials. Extinguishing media to be employed should be that suitable for a Class A (normal combustibles) fire. Water, foam, dry chemical or carbon dioxide should be acceptable methods of extinguishment. Fire-fighters should wear full protective equipment commensurate with fighting a fire involving these materials.

#### SECTION 6: ACCIDENTAL RELEASE MEASURES

The product described herein is a textile fabric. No provisions for spill prevention, control or countermeasure are applicable. No requirements for personal precautions or use of personal protective equipment apply.

#### SECTION 7: HANDLING AND STORAGE

The product described herein is a textile fabric. No special precautions for handling or storage are necessary.

## SAFETY DATA SHEET

#### SECTION 8: EXPOSURE CONTROLS AND PERSONAL PROTECTION

The product described herein is a textile fabric that may contain traces of chemicals used in the processing of the fabric. The trace amounts of chemical present are not expected to pose a health hazard or physical hazard. Consequently, the wearing of personal protective equipment and use of exposure controls should not be necessary when handling this product. Persons who display a sensitivity to the trace amounts of chemicals present in the fabric should avoid contact with the fabric. For such individuals, the wearing of personal protective equipment and/or use of exposure controls may be appropriate. Physical removal from the area of potential exposure may be necessary for highly sensitive individuals.

#### SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

The product described herein is a textile fabric that is supplied to the customer as a solid fabric material. The color, weight and density of the product will vary in accordance with each customer's specifications, as will the product's fire retardance. Depending on the characteristics imparted to the textile fabric, it may melt or burn at high temperature or when exposed to fire of a sufficient duration. The textile fabric is not a flammable material, and it will not produce a flammable vapor. The product has no flash point. Since the other physical properties of the product have no bearing on the product's health hazard or physical hazard, this information has not been determined and is not supplied here.

#### SECTION 10: STABILITY AND REACTIVITY

The product described herein is a textile fabric. The product is stable and non-reactive. No chemical incompatibilities have been identified.

#### SECTION 11: TOXICOLOGICAL INFORMATION

The product described herein is a textile fabric. Based upon our knowledge, we do not believe the product has the ability to cause acute or chronic toxicological (health) effects. The product has not been subjected to testing.

#### SECTION 12: ECOLOGICAL INFORMATION

The product described herein is a textile fabric. Based upon our knowledge, we do not believe the product poses acute ecotoxicity. The product has not been subjected to testing. No information is available regarding the product's chronic ecotoxicity, its persistence or degradability when disposed into the environment, or the potential for decomposition products to bioaccumulate in the environment.

#### SECTION 13: DISPOSAL CONSIDERATIONS

The product described herein is a textile fabric. If disposed of as supplied, the product would not be classifiable as a hazardous waste and would not be regulated under the federal Resource Conservation and Recovery Act (RCRA). While no special waste considerations are expected to apply, the downstream user should consult with regulatory authorities in the appropriate jurisdiction to determine applicable Federal, State and Local disposal requirements.

#### SECTION 14: TRANSPORT INFORMATION

The product described herein is a textile fabric. The product as supplied is not classifiable as a hazardous material under regulations set forth by the U.S. Department of Transportation and it would not be regulated as a hazardous material when shipped by road, rail or air. The textile fabric can be shipped as a non DOT-regulated non-hazardous material.

#### SECTION 15: REGULATORY INFORMATION

The product described herein is a textile fabric. It is not classifiable as, and it does not contain and will not release, in other than trace amounts, a hazardous chemical, a hazardous material, or a hazardous or toxic substance that is subject to regulation or reporting under the OSHA Hazard Communication Standard, The Clean Water Act, The Clean Air Act, or The Superfund Amendments and Reauthorization Act (SARA), including The Community Right-to-Know Act and The Toxic Chemical Inventory Release Reporting Act.

#### SECTION 16: OTHER INFORMATION

This safety data sheet has been prepared in a good faith effort to characterize the potential physical hazards and health hazards of the product described herein. No warranty is made with respect to the accuracy or completeness of the information provided.
