LEADING THROUGH INNOVATION

ISO9001:2008 Registered

Printed thread colors  
may not match the  
actual thread shade.

# PREMOBOND

PremoBond is a continuous filament bonded polyester sewing thread with maximum UV stability. Custom formulated dyes maximize color fastness and minimize the possibility of color transfer.

PremoBond utilizes special custom UV dyes and bond optimization to maintain color stability over years of outdoor use along with anti-wicking properties. Proprietary sewing lubricate enhances sewing performance above industry standards.

Meeting or exceeding current colorfastness standards ISO 105 E01/E02, AATCC 105/106 and ASTM G154. **Made in the USA**

## SPECIFICATIONS

### TOP THREAD

Product Descr.	Tex Size	Strength (lbs.)	Strength (grams)	Needle Size (metric)	Put-up
BPT 92	90	13.3	6,033	120	8 OZ, 1 LB
BPT 138	135	20	9,072	140	8 OZ, 1 LB

### BOBBINS

Product Descr.	Tex Size	Strength (lbs.)	Strength (grams)	Put-up
BPT 92	90	13.3	6,038	U, G & M
BPT 138	135	20	9,080	U, G & M
