## MAIN FEATURES OF SERGE FERRARI

100% waterproof:  
multi layer composite material

Exceptional service life:  
very high resistance to UV radiation and mold

Colorfastness:  
dope-dyed coating process

Compactness:  
remarkable flexibility of composite material

No deformation:  
strength of high-tenacity polyester yarn

Easy upkeep:  
stain-proof shield, simple cleaning  
with soapy water

## TESTED UNDER EXTREME CONDITIONS - TARA

Active since 2003, Tara Expeditions is a non-profit organization whose mission it is to research environmental issues related to the ocean and to increase environmental awareness among the general public. Tara is a legendary boat built for extreme conditions and the platform for high-level scientific research missions. Tara and its crew have completed 10 expeditions over the last 10 years, traveling over 16,000 nautical miles across all the world's oceans.

To protect the on-board equipment and ensure the crew's comfort, Serge Ferrari supplied all of Tara's high-performance composite materials: canopies and shade sails, dodgers, protective covers, and cockpit seating and other upholstery. Serge Ferrari's materials have stood up to the demanding environments, from the extreme cold and storms of the artic, to the brutal sun and heat at the equator.
