Currents

From Sunbrella® x David Rockwell

Inspired by the natural elements of air, earth, and water, the debut collection from Sunbrella® and David Rockwell, Currents, features 35 high-performance fabrics that embrace the spirit of seamless indoor-outdoor living, working and entertaining.

- A. UNDERCURRENT** captures the depth and currents of the ocean with shaded weaves woven with bouclette yarn.
- B. CASSAVA** delivers the authentic feel of handwoven pieces and serves as a foundation texture to the collection, available in a range of colorways.
- C. LEAF STRUCTURE** brings to life a microscopic view of the structure of leaves, balancing the geometric and organic symmetry found in nature.
- D. METAMORPHIC** provides a large boucle texture woven as a conceptual metaphor of the textural surfaces found in nature.
- E. LOTUS** mimics the swirling root pattern of the lotus plant, woven with a mélange yarn for a dynamic carved effect.
- F. MOUNTAINS** emulates the shadows of a mountain skyline, woven with a chenille yarn for a soft, subtle influence balanced by a dramatic scale.

Samples available via
Trivantage® or Material Bank.
