

# A new vision in clear vinyl

Only at Trivantage®, Visilite® is a true all-purpose clear vinyl, known for its crystal clarity and durability. It's flexible and heat sealable for easy handling and is easy to clean. Its standout feature, though, is flame retardance, with options that pass NFPA-701 Test Method 2. This makes it great for commercial restaurant enclosures and tent windows, as well as car and boat windows, marine and patio enclosures. Visilite blocks the elements without blocking the view.
