PATTERNPRO™ ULTRA STABLE PATTERNING FABRIC

Patternpro™ has been a favorite material for Australian fabricators for a number of years. Popular as a pattern material for marine and awning projects, **Patternpro™** has great 'lay-flat' and is coated on both sides. The HDPE will resist wind and water on the job, and the pattern can be saved in your product library for recovers! **And now it's also available in NEW extra-wide width – 157 inches / 4 meters! Full width – not welded or seamed!**

We are pleased to announce that Patternpro™ has been evaluated and awarded a 'Seal of Approval' by Autometrix, Inc; a major manufacturer of cutting machines, for use with their photo digitizing solutions.

Product profile

- Material** – High Density Polyethylene, Virgin grade

- Weight** – 4.87 oz per sq yard/165gsm +/-5%

- Scrim** – 10 x 10 per sq inch

- Width** – 78.7 inches/2 meters and **NEW 157 inches/4 meters**

- Roll Length** – 55 yards/50 meters (rolled on paper cores). (4 meter rolls are center-folded)

- Color** – Translucent (Clear)

- Temperature Resistance** – ~-22 deg F to +158 deg F/-30 deg C to +70 deg

Technical specification

Light transmittance	70%		
Tensile strength	Warp	13KN/m	ASTM D 5035
	Weft	13KN/m	ASTM D 5035
Tear strength	Warp	130 N	ASTM D 751
	Weft	130 N	ASTM D 751
Elongation	Warp	20%	ASTM D 5035
	Weft	20%	ASTM D 5035

Product Disclaimers:

This product is designed for patterning only. This product is not suitable for applications where excessive flexing or 'wind flap' is present. The product specifications represent the results sourced from third party testing authorities, and tolerances may vary by as much as +/- 10%. The Manufacturer reserves the right to alter or modify product specifications and colors without notice, and assumes no obligation or liability for the suitability and use of its products other than those applications intended by the Manufacturer.
